SUMMARY

Enthusiastic and results-driven undergraduate student pursuing a degree in Information Technology, with a strong passion for full-stack software development. Skilled in building robust and scalable web applications using the MERN stack (MongoDB, Express.js, React, Node.js), and proficient in Python, C++, MySQL, and Flask. Adept at writing clean, maintainable code and integrating frontend and backend systems to deliver seamless user experiences. Known for problem-solving abilities, a strong grasp of system architecture, and a collaborative mindset. Eager to contribute technical expertise to innovative development teams and grow as a professional software engineer.

WORK EXPERIENCE

Software Engineer – Backend Developer | Freelancing

Jan 2023 - Present

- Engineered and deployed scalable backend systems for client applications, improving system efficiency and reliability across projects.
- Developed robust RESTful APIs using Node.js, Express.js, and MongoDB, enabling seamless data communication and integration.
- Built and maintained a fully functional e-commerce website, implementing core features like product listings, shopping cart, secure checkout, and order management.
- Collaborated with cross-functional teams to align backend architecture with business logic, accelerating development timelines and reducing post-deployment bugs by 30%

Frontend Developer, Freelance / Outsourced Projects

Mar 2022 - Present

- Developed responsive and user-friendly interfaces using HTML, Tailwind CSS, and JavaScript, reducing client revision cycles by 35%.
- Optimized frontend performance across multiple projects, leading to a 25% improvement in page load times.
- Collaborated with designers and backend developers to ensure seamless integration, increasing overall project delivery efficiency by 20%

EDUCATION

BSc (hons) in information technology

Sep 2020 - Present

Sri Lanka Institute of Information Technology

- Specialization in Information Technology .
- GPA 2.8

PROJECTS

Tea Leaf Disease Analyzer (<https://bit.ly/3GkkEsW>)

- Developed an intelligent system using Convolutional Neural Networks (CNNs) to detect and classify common tea leaf diseases with 92% accuracy.
- Integrated image preprocessing techniques such as histogram equalization and segmentation to enhance diagnostic precision.
- Enabled early detection for farmers, improving crop yield and reducing the use of unnecessary pesticides by 35%.

Full-Stack E-commerce Web Application

- Utilized React.js to build dynamic, component-based UIs with responsive layouts and smooth user interaction across devices.
- Implemented Node.js and Express.js to develop a robust backend API with RESTful architecture, ensuring efficient data handling and business logic management.
- Integrated MySQL for structured, relational data storage supporting user authentication, product inventory, order tracking, and admin panel functionality.
- Optimized performance through API caching, code splitting, and efficient DB queries, reducing page load times by over 30%.
- Collaborated with mock clients to gather requirements, conduct testing, and iterate based on feedback, improving UI usability and feature relevance.

Advanced Plant Disease Analyzer – Automated Detection and Management System for Vanilla | Final Year Research Project

- Engineered an end-to-end AI-powered system to detect, quantify, and monitor diseases in vanilla crops using image processing and deep learning.
- Devised a quality measurement algorithm to assess disease severity, enabling precise treatment strategies.
- Implemented a user dashboard for real-time insights, reducing manual effort and increasing diagnosis efficiency by 60%.
- Showcased innovative application of machine learning in agritech, contributing to smarter and scalable farming solutions.

CERTIFICATES

- **Huawei ICT Competition – Cloud Track**
 - Achieved a high score in the prestigious Huawei ICT Competition – Cloud Track, demonstrating strong proficiency in cloud computing fundamentals and architecture.
 - Gained hands-on experience with Huawei Cloud services, including resource provisioning, networking, and security.

SKILLS SUMMARY

- **Languages**
 - Python, JavaScript, Java, C++, PHP, SQL, HTML, CSS
- **Frameworks & Libraries**
 - React.js, Node.js, Express.js, Next.js, Flutter, Tailwind CSS, Bootstrap, MongoDB, MySQL, SQLite, Firebase, Scikit-learn, TensorFlow, OpenCV
- **Tools**
 - Figma, Adobe XD, Postman, Git, GitHub, WordPress, PowerPoint, VS Code, Android Studio, Jupyter Notebook
- **Platforms**
 - Windows, Linux, Firebase, Netlify, Vercel
- **Soft Skills**
 - Strong stakeholder collaboration, People management, Clear and professional communication, Empathy-driven design thinking, Teamwork & adaptability
